

ioacademy CHALLENGE

Your future starts here and now!

1st Edition - 2018

Overview

Would you like to experiment a new world of formation? - The best of academic formation combined with amazing professional experiences with the goal to improve your skills (technical and soft).

IOTech promotes ioAcademy Challenge – Innovation on Technology and it is an event of "Career 4.0" - Student Career Management activities, aimed at an audience that is still a student, but that is looking for the first contact with companies and the world of work. This challenge is supported by Engineering School Pedagogical Council of the University of Minho.

Are you interested in making the difference and improve your CV? Don't lose this opportunity. Good Luck! 😊

Goal

The primary objective is to promote the transversal training of students, helping them to know the realities of the world of work and contributing to their personal and professional skills.

Dates

Are you interested in our challenge? Pay attention to the following dates:

- ✓ Presentation: March, 28
- ✓ Phase 1: March, 28
- ✓ Selection results: March, 29
- ✓ Phase 2: April 2 - April, 15
- ✓ Presentation: April, 18
- ✓ Final decision: April, 20
- ✓ Phase 3: April, 21

Prizes

This challenge can help to integrate into a professional world. We offer you professional challenges and:

- ✓ Mentoring (can being renewed every academic semester until the end of the course);
- ✓ Continuous formation through online-learning platforms;
- ✓ The possibility of having access to a Summer internship (this prize is attributed according to the results achieved by the student during the formation process).

Rules

This challenge is open to all students, and any student that meet the admission terms can participate. The process starts with the presentation of challenge at the University of Minho. The first selection phase is performed on the same day and immediately after the challenge being presented. In this phase, the participant needs to do a pitch, and we will evaluate their skills (technical and soft) and their desire to join to ioAcademy. This selection process is restricted, and the number of selected participants cannot be superior to 15 (fifteen). After concluding the first phase, the selected students will advance to the phase 2 of the challenge.

In the second phase, each student only can candidate to an open position. The number of positions open by area is available. In this phase, the students must develop/present a solution according to the subject selected and project description. These projects can be developed alone or in a group (the project rules will be available after finishing the first phase). After receiving the project's solutions, the final decision is taken, and 8 (eight) students can be selected. In case of not having any students interested in some project, the respective area and open position are not considered.

Finally, the students involved in the development of best solutions for each area will be invited to integrate ioAcademy.

The positions are open, however, if no one met the requirements the position is not fill.

Phase goals:

Phase 1 – Candidature and Pitch (3min)

You must present your skills and answer to a simple question:

- ✓ Why are you interested in being a member of ioAcademy?

Phase 2 – Project (9 Positions open)

We have positions open in the following areas /subjects:

- ✓ Interoperability (2);
- ✓ PWA (1);
- ✓ Templating (3);
- ✓ Marketing Digital (1);
- ✓ Networks and Cloud Computing (1);
- ✓ Project Management (1);

Phase 3 – Start ioAcademy (by academic semester)

Have you completed all phases with success? Congratulations, you are an ioAcademy member, now. Be welcome!
